EMMA TREVARTHEN: Budock, Constantine, Falmouth, Mabe, Mawnan, Penryn, St Gluvias, Stithians, Wendron (9)

Assessing the load on individual Area Representatives

The average of approximately 6.75 Scheduled Monuments to a Cornish civil parish, with a range from 103 to 0, is of course no more useful for load assessment than the number of parishes, unless that number is very large indeed. The area of land and its nature (e.g. tightly farmed, wooded or moorland) obviously affect the issue.

Peter Cornall, Convenor of ARs/September 2016
